# html - What is ? - Stack Overflow

In html made by fckeditor i find the following character: ☐ What is this character?

## How can I pip install mediapipe python 3.13 - Stack Overflow

The package only provides precompiled binaries (wheels) for specific Python versions, and 3.13 is too new. To install mediapipe, you'll need to downgrade to Python 3.12 or lower.

**(13: Permission denied) while connecting to upstream: [nginx]**

The error message (13: Permission denied) while connecting to upstream typically indicates a permission problem with accessing the upstream server, in this case, your Django app.

# Jupyter notebook permission error [Errno 13] - Stack Overflow

I reinstalled my windows. After this i could not open my jupyter notebook. Doing this solved my problem : Create a New Environment: If you are facing issues with a specific environment, try creating a new one: bash conda create -n myenv python=3.10 conda activate myenv conda install jupyter

## Difference between chr (13) and chr (10) - Stack Overflow

Chr(10) is the Line Feed character and Chr(13) is the Carriage Return character. You probably won't notice a difference if you use only one or the other, but you might find yourself in a situation where the output doesn't show properly with only one or the other. So it's safer to include both.

**A fatal esptool.py error occurred: Cannot configure port ...**

A fatal esptool.py error occurred: Cannot configure port. PermissionError (13, 'A device attached to the system is not functioning.', None, 31) Asked 2 years, 9 months ago Modified 2 months ago

## **python - Errno 13 Permission denied - Stack Overflow**

PermissionError: [Errno 13] Permission denied: 'C:\\Users\\\*\*\*\\Desktop\\File1' I looked on the website to try and find some answers and I saw a post where somebody mentioned chmod. 1. I'm not sure what this is and 2. I don't know how to use it, and that's why I've come here.

## **Trying to understand CHAR(10) and CHAR(13) in SQL Server**

CR (13) + LF (10) combine to create 1 total carriage return. If you do it in the opposite order, the LF forces the CR to be on a new line, producing 2 carriage returns.
