## xml - What is HTML Entity ' '? - Stack Overflow

In the process, some kind of whitespace within elements is being converted into `&#xA0;`. It's pretty difficult to search for this one since search engines treat this character as whitespace. How do I scrub this character out of my xml output, or at least replace it with a different, preferable whitespace character? Thanks.

## html - What is ? - Stack Overflow

In html made by fckeditor i find the following character: `&#160;` What is this character?

## upgrade - How to download and offline install Visual Studio 2022 ...

Go to the Visual Studio 2022 Release History page and download a particular fixed version bootstrapper (e.g vs\_Enterprise17.13.0), copy it into your layout, and use it to update the layout to that exact version specified in the bootstrapper. Run the --layout command in an elevated prompt to download the latest packages into your layout.

## Difference between chr (13) and chr (10) - Stack Overflow

Chr(10) is the Line Feed character and Chr(13) is the Carriage Return character. You probably won't notice a difference if you use only one or the other, but you might find yourself in a situation where the output doesn't show properly with only one or the other. So it's safer to include both.

## How can I pip install mediapipe python 3.13 - Stack Overflow

The package only provides precompiled binaries (wheels) for specific Python versions, and 3.13 is too new. To install mediapipe, you'll need to downgrade to Python 3.12 or lower.

## Trying to understand CHAR(10) and CHAR(13) in SQL Server

CR (13) + LF (10) combine to create 1 total carriage return. If you do it in the opposite order, the LF forces the CR to be on a new line, producing 2 carriage returns.

## How to resolve "No module named 'imghdr'" error in Python 3.13 with Tweepy?

My questions: Is imghdr indeed removed in Python 3.13? What alternative libraries or approaches can I use to check image file types with minimal changes to my existing code? I appreciate any guidance or suggestions on how to handle this issue. Thank you! I expected the program to run without issues, as it worked in previous Python versions.

## Python v3.13 has broken Email delivery due to an SSL change

It appears that version 3.13 of Python has changed the requirement for one of the settings in SSL certificates. And if your email servers certificates do not have this new setting set, your emails deliveries will fail with an SSL failure.
