Formal proof for $(-1) \times (-1) = 1$ - Mathematics Stack Exchange

Is there a formal proof for $(-1) \times (-1) = 1$? It's a fundamental formula not only in arithmetic but also in the whole of math. Is there a proof for it or is it just assumed?

1-1+1-1+1-1+1... □□□□□□□□□□□□□□□□□□ - □□

2011 1

$$1/1+1/2+1/3+1/4+.....+1/n=\square\square\square\square\square\square - \square\square$$
$$\frac{1}{n} \left(\ln n - \ln \left(\frac{n-1}{n} \right) \right) = \frac{1}{n} \left(\ln n - \ln (n-1) + \ln n \right) = \frac{1}{n} \left(2 \ln n - \ln (n-1) \right)$$

1/8, 1/4, 1/2, 3/4, 7/8 □□□□□□□□? - □□

Q1: $1/8, 1/4, 3/8, 1/2, 5/8, 3/4, 7/8$ This is an arithmetic sequence since there is a common difference between each term. In this case, adding 18 to the previous term in the sequence gives the next term. In other words, $a_n = a_1 + d(n-1)$. Arithmetic Sequence: $d=1/8$
