html - What does the HTTP 206 Partial Content status message mean and ...

The HTTP 206 Partial Content success status response code indicates that the request has succeeded, and the response body contains the requested ranges of data, as described in the Range header of the request. If there is only one range, the Content-Type of the whole response is set to the type of the document, and a Content-Range is provided.

HTTP Status Code 206: When should it be used? - Stack Overflow

The 206 status code (w3.org) indicates a partial result in response to a request with a Range header. So "clearly" if the requested document is e.g. 1024 bytes long, and the Range header is bytes=0-512 then a status code of 206 Partial Content should be returned.

Can you specify error with HTTPS-206 response? - Stack Overflow

The HTTP 206 status code (like all status codes in the 2xx range) represents "successful" fulfillment of the request, so if you are trying to represent a partial failure, it would probably not be the best choice. 206 is about the response and generally is in response to a request that uses a range header (in other words, a request for only part ...
