I couldn't change my office license from 2016 to 365 subscription

It still on 2016 version. FYI, after I clicked the change license button, it said I still have slots to activate microsoft 365 (2 of 5 active installation). It also said that the change license is succeed and asked me to restart any office application to activate microsoft 365 license, but it doesn't work. Can someone help me with this?

Set Default Data File for Outlook 2016 - Microsoft Community

Set Default Data File for Outlook 2016 Greetings! This is actually an issue I've had since the 2013 version too, but anyway: When I installed Outlook onto my computer, I set it up to work with my Outlook.com account through EAS. Everything worked fine, things went in the right folders, etc. The .ost file is stored in my local AppData folder.
