.375 is equal to how many inches? - Answers

375. 375 cm is equal to 12.3 feet. 375 grams = 13.23 ounces. .375 inches is equivalent to $\frac{3}{8}$ of an inch. This decimal is derived from dividing 3 by 8, which results in 0.375. Therefore, .375 inches represents a measurement slightly less than half an inch.

What does .375 inch look like on a ruler? - Answers

On a ruler, .375 inches is equivalent to $\frac{3}{8}$ of an inch. It is located between the $\frac{1}{4}$ inch mark (0.25 inches) and the $\frac{1}{2}$ inch mark (0.5 inches). Specifically, it is three tick marks past the $\frac{1}{4}$ inch mark. If using a standard ruler, you'll find it slightly closer to the $\frac{1}{2}$ inch mark than to the $\frac{1}{4}$ inch mark.

How do you multiply 375 X 12? - Answers

What is the LCM of 250 and 375 using prime factorization? To find the Least Common Multiple (LCM) of 250 and 375 using prime factorization, you first need to factorize each number. $250 = 2 \times 5^3$ and $375 = 3 \times 5^3$. Then, identify the common and uncommon prime factors: 2, 3, and 5.

What is 0.375 multiplied by 100? - Answers

To find 0.375 multiplied by 100, you can simply move the decimal point two places to the right to convert the decimal to a percentage. This gives you 37.5. So, 0.375 multiplied by 100 is equal to 37.5.

WHAT IS 375 X 5? - Answers

What is the LCM of 250 and 375 using prime factorization? To find the Least Common Multiple (LCM) of 250 and 375 using prime factorization, you first need to factorize each number. $250 = 2 \times 5^3$ and $375 = 3 \times 5^3$. Then, identify the common and uncommon prime factors: 2, 3, and 5. Finally, multiply the highest power of each prime factor together to find the LCM: $\text{LCM}(250, 375) = 2 \times 3 \times 5^3 = 1500$.

How do you write 0.375 as a fraction? - Answers

0.375 is a fraction. It is a fraction in decimal form rather than in the form of a ratio. However, that does not stop it being a fraction. Its equivalent, in rational form, is $\frac{375}{1000}$. You can simplify this rational fraction if you require.

What is 0.375 in a inch? - Answers

What is 3.75 percent of 375000? 12 is what percent of 320? What is the phone number of the Compton Library in St. Louis? How many teaspoon is 0.375 ounce?

What is 375 as a product of prime factor in index form?

To express 375 in prime factor index form, first, factor it into its prime components. The prime factorization of 375 is (3×5^3) because $(375 = 3 \times 125)$ and $(125 = 5^3)$.

What is HCF of 375 and 150? - Answers

Oh, dude, the highest common factor (HCF) of 375 and 100 is 25. Basically, it's the largest number that can divide both 375 and 100 without leaving a remainder. So, like, 25 is the winner here, making sure both 375 and 100 are happy and whole.
