Portus | Harbour, Imperial Port & Trade Hub | Britannica

Portus, harbour town of imperial Rome. The artificial harbour at Portus, constructed by the emperor Claudius I (ad 41–54) to replace Ostia (q.v.), was connected to Rome by canal and the Tiber River.

Exploring Portus: Unearthing Rome's Ancient Port - Roman Empire

Portus was a large artificial harbour established by Claudius and enlarged by Trajan to supplement the nearby port of Ostia. It served as the Roman Empire's leading maritime hub for nearly 500 years, making it one of their greatest engineering achievements.

Features - Rome's Imperial Port - Archaeology Magazine

Portus was the answer to Rome's centuries-long search for an efficient deepwater harbor. In the end, as only the Romans could do, they simply dug one. Still visible today, Portus' hexagonal...

Portus Project

Portus was the most important maritime port in the Roman empire. It was established by the emperor Claudius in the mid first century AD, initially to both boost limited anchorage facilities at Ostia and ease the dangers of flooding in the lower reaches of the Tiber.

Portus - port of Roman Empire - IMPERIUM ROMANUM

Therefore, in the first century CE the emperor Claudius founded Portus, i.e. the imperial seaport, which was used continuously until the eighth century, when the fleet resided in it under the command of Pope Constantine (708-715).

portus - VRoma

It also signified Rome's harbor at the mouth of the Tiber, which was almost silted over by the mid-1st century BCE (see Ostia: Harbour City), as well as the harbor town, itself called Portus, both of which were connected to Rome by the via ostiensis.
