Re-seal exposed aggregate concrete or not? - DIY Home Improvement Forum

We built our Louisville, KY home 2 years + 10 months ago. 2 months after the exposed aggregate concrete was poured for the driveway, front steps, front porch & patio, we applied 2 coats of curing agent/sealer SUPER SEAL 30 VT | Nashville TN | Clemons Concrete Coatings. We are struggling with...

Drilling Exposed Aggregate? - DIY Home Improvement Forum

Last time I did it over exposed aggregate at a friends house the bit wanted to walk like crazy which made it very hard to drill accurately.. Anyway to more precisely drill these? I will be drilling 52 holes in this exposed aggregate so the more accurate the better. I do have a roto hammer as well, the issues is not my tool is the bit itself walking on the aggerates before it starts to actually ...

Exposed aggregate--inconsistent surface--advice? - DIY Home Improvement ...

We had a new driveway and walkway poured 7 days ago. It is exposed aggregate that looked OK wet when first washed to expose the small rocks. As it dries/cures, however, the surface appears splotchy as if the washing was not consistent or complete. It looks as though the small rocks were...

Repairing exposed aggregate steps - DIY Home Improvement Forum

Hi. New to the forum. Our front door step which is made of exposed aggregate has developed a full length crack and at one end is starting to see some larger pieces of concrete chipping away. Having done a number of searches on the internet, I think I have a rough idea of how to fix exposed...

New French Drain System: #57 or #4 crushed stone

In the aggregate industry, gravel is a natural product created by natural forces. Crushed stone, of course, is produced by mechanical rock crushing equipment. I'm told that crushed stone is a better option because the squared edges create more gaps and the rounded edges of natural gravel creates smaller gaps.

concrete from mortar - DIY Home Improvement Forum

Anytime you mix cement and aggregate, the more surface area of the aggregate you have, the more cement that is required to coat all of the particles and tie them together. The extra cement requires extra water to make mortar more usable. It is difficult to compare mortar with concrete because they are designed to do different things.

Pebble Overlay (over existing concrete patio) - DIY Home Improvement Forum

On a recent Yard Crashers show, the host (Ahmed), showed a pebble mixture that gets combined with some sort of epoxy and gets troweled over existing concrete. Looks Great? Any idea where I can get this product? Thanks.

I'm building a small retaining wall. Can I get...

Trying to build a wall because just because you have the blocks is a solution looking for a problem. If the problem is having them, give them away or haul them to an aggregate plant that will crush them and sell the recycled/crushed material.

Concrete Question (Pea Gravel) | DIY Home Improvement Forum

I get the idea that the trailer pumps are smaller than the big boom trucks and the pea gravel tends to flow through the hose easier.. (kind of guessing on that one) So my question: Will substituting pea gravel instead of the normal larger limestone or other aggregate weaken the concrete? Are there any drawbacks to this I'm not considering?
