## The Global Status Report on Oral Health 2022

WHO's Global oral health status report provides the first-ever comprehensive picture of oral disease burden and highlights challenges and opportunities to accelerate progress towards universal coverage for oral health.

### Oral health

Oral health is a key indicator of overall health, well-being and quality of life. It encompasses a range of diseases and conditions that include dental caries, Periodontal disease, Tooth loss, Oral cancer, Oral manifestations of HIV infection, Oro-dental trauma, Noma and birth defects such as cleft lip and palate. The Global Burden of Disease Study 2017 estimated that oral diseases affect 3.5 ...

### The first-ever global oral health conference highlights universal ...

Delegations from over 110 countries are coming together to produce national roadmaps and negotiate a joint declaration on oral health at the first-ever global oral health meeting organized by the World Health Organization (WHO). The declaration is expected to outline collective commitments from Member States to accelerate the implementation of the Global action plan on oral health 2023-2030.

### WHO releases Global strategy and action plan on oral health

Member States have demonstrated their commitment to improving oral health in recent years by adopting the landmark Resolution on oral health in 2021 and the Global strategy on oral health in 2022. This was followed in 2023 by the development of the Global oral health action plan 2023-2030, which translates the vision, goal, and strategic objectives of the global strategy into a series of 100 ...

### cvpr poster,oral,spotlight

We believe that this new presentation format (oral/spotlight/poster) will make CVPR'16 a more exciting conference. Authors will receive further practical instructions on how to prepare their spotlight presentations within the next few weeks. ORALS>SPOTLIGHTS>POSTERS

### Oral health

The oral health workforce includes dentists, oral health therapists, dental hygienists, dental nurses, dental assistant and dental technicians. However, essential dental medicines and preparations could be delivered by other health care professionals in primary health care such as nurses, midwives and

community health workers.

## Oral health

Oral health inequalities Oral diseases disproportionately affect the poor and socially disadvantaged members of society. There is a very strong and consistent association between socioeconomic status (income, occupation and educational level) and the prevalence and severity of oral diseases.
