## Extract Value from Array in Power Automate - Stack Overflow

Extract Value from Array in Power Automate Asked 1 year, 2 months ago Modified 10 months ago Viewed 7k times

## power automate - How to write Search Query in Get Emails (v3)? - Stack ...

I am writing a Power automate to copy emails from an Outlook mailbox to SharePoint. I am using Get emails (V3) and want to retrieve emails received on a particular date.

## How to use Power Automate flows to manage user access to SharePoint ...

Send an HTTP request to SharePoint action in Power automate flows works with SharePoint REST APIs. Follow below Microsoft official documentations for SharePoint REST API endpoints related to permissions management: Set custom permissions on a SharePoint list by using the REST interface Users, groups, and roles REST API reference If you understand how the SharePoint REST APIs work with ...

## Running Python scripts in Microsoft Power Automate Cloud

I use Power Automate to collect responses from a Form and send emails based on the responses. The main objective is to automate decision-making using Python to approve or reject the form. I am awar...

## How to query on-premises SQL Server database using power automate ...

Using "Power Query" This has similar issues to 2, that it won't allow power automate variables. Consider Using Azure Managed Instances and linking the on-premises db to this instance, but can't see a obvious way for Azure to communicate with the on-prem SQL db.

## Power Query code to refer to another query (and how buffering works)

Is this just part of the building process? Or If I have one query A that loads across the network and 5 follow up queries that refer to query A will power query / excel be reading the across the network 1 time or five times? What is the proper way in Power Query to refer to an existing query and reduce

data pulls across the network?

## **Get email categories in Microsoft Power Automate - Stack Overflow**

But in Power Automate, if I use the "Send an HTTP Request" action (under "Office 365 Outlook") and send a request to that same endpoint, it returns a lot of the message information but not the categories. I have also tried the "Get Email (V2)" and "Get Emails (V3)" actions, neither of them includes categories in the output either.

## **Get email with Message-Id using Power Automate - Stack Overflow**

The goal is to get an Outlook email with it's Message-Id from Power Automate. I get an email's Message-ID from my personal Outlook Web mailbox: Next, I create a Power Automate flow to get this email

## **Power BI: excluding a visual from a slicer - Stack Overflow**

On the Power BI Desktop menu, select the Format menu under Visual Tools, and then select Edit interactions. You need to have the slicer selected. Only then you see the according Filter on/off symbols next to the visuals. When the visuals are close to each other it's sometimes hard to tell which filter switch belongs to which visual. Try pulling them temporarily apart.

## **Create a export to excel button in Power BI - Stack Overflow**

I need to create a button (like "Export to Excel") in order to export data from a table in Power BI. This file needs to be downloaded in a folder on my PC, for example the folder "Download" or "Desktop".
