## Windows not booting after changing something in msconfig.

Windows not booting after changing something in msconfig. Hi I went into my msconfig to change the cores for my cpu and memory now I keep getting a blue screen and windows whe. I try to boot won't I have already tried some advanced options and made a windows restore so far nothing work can someone help me please and thankyou.

## Black screen with a blue loading cursor - Microsoft Community

Based on your description, I understand that you have a black screen with a blue loading cursor after restarting your computer, and I understand very well how you feel! I see that you have tried a number of options and commend you on your problem solving skills and thought process! This problem I guess could be due to some of the following ...

## Windows Activation after transferring drives. - Microsoft Community

Windows Activation after transferring drives. I previously had an m.2 sata ssd, and wanted more storage as well as performance, so I picked up an m.2 nvme drive. I used the media creation tool to create a windows installation, and booted up the pc from the new drive and installed windows.

## Memory problem after Windows 10 upgrade - Microsoft Community

Memory problem after Windows 10 upgrade Ever since upgrading from Windows 8.1 to Windows 10 a couple of months ago, I have had a HUGE usage of memory.

## Can't boot, not even in safe mode after last update.

After the last update I was having constant usb device errors. One was for a logitech camera but the others I believe were for a card reader installed in my case. I tried disabling the devices but I

## My touchpad starts behaving errantly after keeping laptop on for a ...

After keeping laptop on for long hours, the touchpad begins behaving errantly, the pointer suddenly changing its position to either top right corner or bottom left corner of the screen on double tapping on touchpad. But, using windows 7, it works just fine.

# My laptop isn't booting up after a factory reset of Windows 10

So I factory reset my ASUS ROG GL752VW laptop to return to factory state because I wanted a fresh start to Windows. When the machine restarted in the process of the reset, it does not boot up and it

# Mouse pad won't work after Windows 10 update - Microsoft Community

Mouse pad won't work after Windows 10 update I updated to Windows 10 last night, and started up my computer this morning to see the changes. Everything is great, working properly and efficiently, but the mousepad/mouse is not working at all. I've looked in the settings at the mouse, and it says that it's working, but obviously it's not.

# Screen go black after reboot - Microsoft Community

Screen go black after reboot I have a reoccurring problem of which I cannot figure out the cause. When I reboot my PC and click on a browser (Firefox, Google Chrome, Edge) or open an app, they open and then freezes a few seconds--then goes black for about 10 to 13 seconds. After that I can click on whenever without that happening again until I ...

# Your PC/Device needs to be repaired - Microsoft Community

Now that you are in winRE, you will have to follow these steps to go to safe mode: On the Choose an option screen, select Troubleshoot> Advanced options> Startup settings> Restart. After the device restarts, a list of options will appear. Select option 5 from the list or press F5 to start Safe Mode with Networking. We're here to serve you Jesus C.
