How to read Blood Meridian? : r/books - Reddit

How to read Blood Meridian? I'm having some trouble getting into Blood Meridian. I've read both The Road and No Country For Old Men, and I like McCarthy's style through out both of those books. However, about 60 pages in to Blood Meridian, I find myself bored with the plot.

Blood Meridian short comic adaptation : r/cormacmccarthy - Reddit

One of the themes for the graphic design department was a comic adaptation of a novel, and since Blood Meridian is my favourite book ever and notoriously difficult to adapt into anything other than a book (and I have a bit of an obsession with the western genre) I thought I'd take a risk and make it into a comic adaptation.

Blood Meridian. A brilliant yet horrifying book : r/books - Reddit

Blood Meridian is my favorite book and that passage is a perfect example of why. The philosophy is stark, brutal, and unrelenting. Combine the existential dread in this passage with the unapologetic view that the only truth to be found in the world is through violence, and you are in for one disturbing read. I agree with the themes of the book.

Reading Blood Meridian, what the hell is Glanton's gang doing?

This is my first McCarthy book, it's difficult but I'm really enjoying it. So I don't know if I missed something, but it feels like Glanton's gang is just wandering around doing random things. What's the purpose of their group? Why are they just aimlessly roaming and occasionally meeting some people and engaging in random gunfights? I'm on chapter 11 by the way. I can't say I ...
