Here's how to give first aid for a swallowed foreign object.

Mayo Clinic

During pregnancy, many signs and symptoms are perfectly normal. Others require prompt medical attention. Here's when to contact your health care provider during the third month (weeks nine through 12) of pregnancy. If in doubt, make the call.

7. Pay attention to your feet - Mayo Clinic

High blood sugar can reduce blood flow and damage the nerves in your feet. Left untreated, cuts and blisters can lead to serious infections. Diabetes can lead to pain, tingling or loss of sensation in your feet ...

Alanine aminotransferase (ALT) blood test - Mayo Clinic

Overview An alanine aminotransferase test, also called an ALT test, is a blood test to check the health of your liver. ALT is a substance found mostly in the liver. If your liver is OK, the ALT level usually stays low. But when liver cells are irritated or damaged, ALT can leak into the bloodstream. So the ALT level can go up.
