Mayo Clinic Q and A: Treating burns

A burn requires immediate medical attention if it covers a large area of the body, or if it involves much of the hands, face, feet, genitals, buttocks, eyes, mouth or a major joint.

Burns: First aid - Mayo Clinic

Electrical burns, including those caused by lightning, and major chemical burns need emergency medical care. A minor burn might need emergency care if it affects the eyes, mouth, hands or genitals. Babies and older adults might need emergency care for minor burns as well.

Second-degree burn - Mayo Clinic

A second-degree burn often looks wet or moist. It affects the first and second layers of skin, which are called the epidermis and the dermis. Blisters may develop, and pain can be terrible.

Does anyone have your feet burn really painful and your toes get red

But the evening toe burn shows up even on days when I've done very little standing & walking. My issues with this have increased over the years. One thing that offers some relief to me is gel ice boots. Wearing socks, I put the ice packs which are in the shape of short boots, on my feet for 10-15 minutes. You can't walk in them!

Silver sulfadiazine (topical route) - Side effects & dosage

To help clear up your skin or burn infection completely, keep using this medicine for the full time of treatment. You should keep using this medicine until the burned area has healed or is ready for skin grafting.
