## **Stories | Khan Academy**

I am a freshman in high school this year at the "best IB school in the U.S" (quote the IB program). At the beginning of the school year, I was off to a rough start in Biology.

## **About Our Content Specialists | Khan Academy**

Formerly, she taught biology, Hebrew, and music in a high school in New York City. She graduated from Touro College with a major in Biology and is now applying to medical school.

## **An organism's niche (video) | Khan Academy**

Organisms need specific abiotic factors for development, survival, and reproduction, and have a tolerance range for each. The fundamental niche of an organism represents the environmental conditions in which it could exist, but its realized niche is often restricted by species interactions and resource availability. Species vary from specialists, with narrow niches, to generalists, with broad ...
