Tiki Wiki CMS Groupware is a comprehensive web application for group collaboration and communication as well as data input, management and presentation that has been continuously developed since...

Installation | Documentation for Tiki Wiki CMS Groupware

If you select a different encoding method, you may need to manually update your ../db/local.php file. Tip: If you plan on having multiple Tiki installations, don't use tiki as the database name. Be sure to record the database name; you will need it later. Create a database user (with password). Again, simple is best for the database username. In fact, you can use the same name that you ...
