"Dieta del capibara *Hydrochaeris hydrochaeris* (Rodentia: Hydrochaeridae) en Caño Limón, Arauca, Colombia" [Distribution and abundance of Caiman crocodilus in the Caño Negro National Wild Life Refuge, Costa Rica].

Capybara | Description, Behavior, & Facts | Britannica

Capybara, either of two species of large semiaquatic South American rodents. Capybaras live in forests and wetlands from Panama to Argentina. The larger species, *Hydrochoerus hydrochaeris*, is the world's largest living rodent, growing up to 1.3 meters (4.3 feet) long and weighing up to 79 kg (174 pounds).

Capybara Facts | National Geographic

The biggest rodent in the world, the semi-aquatic capybara spends most of its time grazing or swimming in the nearest body of water.

Capybara - San Diego Zoo Animals & Plants

Feeling right at home. Capybara live in Central and South America. They roam the swampy, grassy regions bordering rivers, ponds, streams, and lakes. Long in the teeth. Because capybaras are rodents, they share some common features with mice, squirrels, and porcupines. The most well-known of those features are probably those ever-growing front teeth. Capybaras use their long, sharp teeth for ...

Capybara Animal Facts - *Hydrochoerus hydrochaeris* - A-Z Animals

The Capybara is a large, semi-aquatic rodent that is found inhabiting the water-logged regions of Central and South America. Closely related to other South American rodents such as Chinchillas and Guinea Pigs, the Capybara is the largest rodent in the world weighing up to 75kg and measuring nearly 1.4 meters long. Despite their enormous size [...]

Hydrochoerus hydrochaeris (capybara) | INFORMATION | Animal ...

Geographic Range *Hydrochoerus hydrochaeris* is a strictly South American rodent species. Its range extends throughout most of Brazil, Uruguay, Venezuela, and Columbia, south into the Argentinian pampas, and west to the Andes. Biogeographic Regions neotropical native Habitat Capybaras are found only in areas where water is easily accessible: flooded grasslands are a favored habitat, as are marsh ...

capybara (Hydrochoerus hydrochaeris) - Species Profile

capybara (Hydrochoerus hydrochaeris) - Species Profile Capybaras do very well on cattle ranches and may compete for forage with cattle; management for cattle is well suited to their needs (Mones and Ojasti, 1986). There are no known investigations into its impacts in Florida. More than 80 parasite names, including many tick species, are found in the literature associated with Capybaras (Mones ...
