CANINE Definition & Meaning - Merriam-Webster

Canine is not only an adjective but also a noun. Dogs and their relatives in the Canidae family—the wolves, jackals, foxes, and coyotes—are often called canines.

Dog - Wikipedia

The dog (*Canis familiaris* or *Canis lupus familiaris*) is a domesticated descendant of the gray wolf. Also called the domestic dog, it was selectively bred from a population of wolves during the Late Pleistocene by hunter-gatherers. Dogs were the first species to be domesticated over 14,000 years ago, before the development of agriculture. Due to their long association with humans, dogs have ...

Canine | Natural History, Importance to Humans &

Classification ...

Canine, (family Canidae), any of 36 living species of foxes, wolves, jackals, and other members of the dog family. Found throughout the world, canines tend to be slender long-legged animals with long muzzles, bushy tails, and erect pointed ears.

Canine - Pet, Hunting, Protection | Britannica

Canine - Pet, Hunting, Protection: The domestic dog is the canine of the greatest economic significance. Some other canines are bred or hunted for fur, food, or sport. Among the carnivores, canines are more closely related to bears and weasels than felines, civets, mongooses, and hyenas.

Caninae - Wikipedia

The three extant canine tribes: tribe Canini, the dog-like canines (represented by a black-backed jackal); tribe Vulpini, the fox-like canines (represented by a red fox); and tribe Urocyonini, represented by a gray fox.
