java - What exactly is Apache Camel? - Stack Overflow

I don't understand what exactly Camel does. If you could give in 101 words an introduction to Camel: What exactly is it? How does it interact with an application written in Java? Is it something...

java - Send POST Request using Apache Camel - Stack Overflow

This page explains how to send POST requests using Apache Camel, a powerful integration framework for routing and processing messages.

Apache Camel - Triggering a task on startup to run only once

I am working on a Java project using Camel & Spring. We would like to trigger an initialize method on a singleton bean after Spring finished doing its thing and Camel has finished building all ...

Camel case and Pascal case mistake - Stack Overflow

Camel case: As the name show it follow the camel structure of word like mossawarHussain
Difference: Pascal is a subset of Camel case. The first letter of Pascal is capital and first letter of the camel is small that is the major difference between these two cases.

Apache Camel with IBM MQ - Stack Overflow

Hello has anyone ever used Camel with IBM's MQ. We are looking at possibly using the two products together but have no example of the two products working together.

How to set Camel HTTP4 connection timeout options?

The documentation at Camel HTTP4 is quite clear that you can set the following options for the HTTP4 component: connectionRequestTimeout, connectTimeout, and socketTimeout. However, these are liste...

java - Soap Request with Apache Camel - Stack Overflow

i have a wsdl file hosted on a site (which i can't share), and i want to invoke a soap request through apache-camel framework. I created a maven project, and used the component apache-cxf to compil...

Camel Kafka - consumersCount and groupId - Stack Overflow

When configuring Apache Camel as a consumer for Apache Kafka, you can set many configuration options including the following that are relevant for this question: `groupId`, `consumersCount`, and potentially `groupId`.

How to configure Jackson ObjectMapper for Camel in Spring Boot

I have read the Camel JSON documentation, but it does not show how to add a custom `DataFormat` using Spring configuration, or how to apply a global customisation for all types. So how can I tell Camel to use my `ObjectMapper`, using only Spring Boot Java configuration?

Elegant Python function to convert CamelCase to snake_case?

If you use Google's (nearly) deterministic Camel case algorithm, then one does not need to handle things like `HTMLDocument` since it should be `HtmlDocument`, then this regex based approach is simple.
