## **Hyper-V 2012 R2 Virtual Server that crashes every 8 hours, on the dot!**

that are Hyper-V virtual servers and they are working great. We've ran all kinds of virus and malware scans and everything is clean. By the way the Host Server is 2016 R2 Standard

## **KB4048957 - Problem Print For Epson dot matrix printer**

I had facing an issue on this window update (KB4048957) when I use the Epson printer.

## **Powershell convert csv to xlsx - [social.technet.microsoft.com](https://social.technet.microsoft.com)**

I've seen on alot of websites the ability to convert from xls to csv using Powershell but how would you go about converting from a csv to a xlsx file?

## **OWA users cannot download PDFs - [social.technet.microsoft.com](https://social.technet.microsoft.com)**

My organization is having an issue with what apparently seems to be only PDF attachments in OWA. When a user clicks on a PDF they are told they need to preview it first before downloading. But this issue is only happening with PDF files, Office, images, mp3 files when clicked will offer a download as normal. .pdf is in the AllowedFileTypes in Get-OWAMailboxPolicy

## **DNS resolutions completing with delay**

I have tried it from a server with Network Monitor 3.4 installed and watched outgoing traffic. The strange thing is, when querying the Los Angeles server, I do not see the first few DNS queries going outbound. If I look to the New York server, I first see a PTR resolution of the 10.0.0.10 address, and then see a query for fs1.contoso.com. If I look to the Los Angeles server, the first packet I ...

## **Calling powershell script from a batch file**

-File Runs the specified script in the local scope ("dot-sourced"), so that the functions and variables that the script creates are available in the

## **IKEv2 VPN Certificate Problem - social.technet.microsoft.com**

The CA runs Hardened Gentoo with OpenSSL 1.0.0e I have included a link to my certificate (public part only) it's at rghost (dot)net (slash)56905698 Edited by Vyron Tsingaras Tuesday, July 22, 2014 2:02 PM Tuesday, July 22, 2014 9:46 AM

## **Robocopy - exclude destination files from /MIR**

Attempting to do a nightly run of robocopy while we transfer over to a new file server. We've a load of extra files with an offline attribute on the destination, which are files archived by Enterprise Vault which we moved in advance, and so these must not be touched.

## **Mail Merge Directory Page Break on Change in Data Source Field Value**

I have a data source that I am using in mail merge. The main document is set up in table format to keep the data formatted nicely and I merge the data source data into the main document as a Directory document . There are additional fields in the data source but the important ones are listed below. I need my directory to page break each time the the resident district code changes. In the end ...
