Adjustment Disorder DSM-5 Criteria - HealthyPlace

To be diagnosed with adjustment disorder, someone must meet specific criteria outlined in the DSM-5. Learn what the adjustment disorder criteria are.

Adjustment Disorder with Disturbance of Conduct - HealthyPlace

According to the DSM-5, all adjustment disorders are caused by an identifiable stressor (s) of any severity. Further, a diagnosis of an adjustment disorder means that the person is experiencing significant symptoms that negatively affect many areas of life.

Adjustment Disorder with Mixed Anxiety and Depressed Mood

The DSM-5 discusses adjustment disorder with mixed anxiety and depressed mood as one of six types of adjustment disorders. In this adjustment disorder, someone experiences symptoms of both anxiety and depression.

Adjustment Disorder with Depressed Mood - HealthyPlace

The American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5), the accepted authority on mental health disorders, discusses adjustment disorder with depressed mood as one of six types of adjustment disorders.

Adjustment Disorder with Anxiety - HealthyPlace

Adjustment disorder with anxiety is caused by one or more specific stressors that can be identified. Prior to the onset of the stressor, symptoms of anxiety are either absent or minimal. If the stressor leads to anxiety, then adjustment disorder with anxiety is likely.

What is Acute Stress Disorder, Acute Stress Reaction?

Acute stress disorder and acute stress response are reactions to trauma. Learn the causes, criteria, and who is susceptible to acute stress disorder.

References to Adjustment Disorder - HealthyPlace

Distinguishing between adjustment Disorder and depressive episode in clinical practice: The role of personality disorder. Journal of Affective Disorders, 168, 78-85.

The DSM-5: The Encyclopedia of Mental Disorders - HealthyPlace

The DSM-5 is sometimes called the encyclopedia of mental disorders. What does it tell us about different mental disorders, and is the DSM-5 any good?

Dissociative Identity Disorder (DID) DSM-5 Criteria

The criteria for a dissociative identity disorder (DID) diagnosis are defined in the Diagnostic and Statistical Manual of Mental Disorder, Fifth Edition (DSM-5).

Diagnosing Schizoaffective Disorder: DSM-5 Criteria

The difference between schizoaffective disorder and a mood disorder such as bipolar disorder is subtle, but the DSM-5 delineates the criteria for each, thus helping doctors make the right diagnosis (and thus get the correct schizoaffective disorder treatment).
