

# **date of personal significance meaning**

*AI generated article from Bing*

## windows - What does

%date:~-4,4%date:~-10,2%date:~-7,2%\_time:~0,2% ...

The above command line defines an environment variable with name `fileName` starting with fixed string `db_`, appending with `%date:~-4,4%` the last four characters of the current locale date which is obviously the year, appending with `%date:~-10,2%` the tenth and ninth characters from right side of the current locale date which is most likely the month,

## Delete all old emails after a certain date - Gmail Community

Delete all old emails after a certain date I have too many emails. How do I delete all those older than a certain date? I haven't tried anything because I can't keep selecting and deleting 10,000 old emails.

DATE - Google   

DATE(1969,1,32) 1 32 2/1/1969 Date 12.75 12

## date = new Date (); date.valueOf () vs Date.now () - Stack Overflow

`new Date().getTime()` Functionally equivalent to `new Date().valueOf()` `Date.now()` Functionally equivalent to the 2 methods above As mentioned in the comments and MDN links, `Date.now()` is not supported in Internet Explorer 8. So if IE 8 compatibility is a concern you should use `new Date().valueOf()` at the cost of slightly diminished code readability.

## How do I format a Microsoft JSON date? - Stack Overflow

/Date(1224043200000)/ From someone totally new to JSON - How do I format this to a short date format? Should this be handled somewhere in the jQuery code? I've tried the `jQuery.UI.datepicker` plugin using `$.datepicker.formatDate()` without any success. FYI: Here's the solution I came up with using a combination of the answers here:

## How do I query for all dates greater than a certain date in SQL Server ...

where `A.Date >= '2010-04-01'` it will do the conversion for you, but in my opinion it is less readable than explicitly converting to a `DateTime` for the maintenance programmer that will come after you.

## **bash - YYYY-MM-DD format date in shell script - Stack Overflow**

I tried using \$(date) in my bash shell script, however, I want the date in YYYY-MM-DD format. How do I get this?

### **What is this date format? 2011-08-12T20:17:46.384Z**

Instant.parse ( "2011-08-12T20:17:46.384Z" ) ISO 8601 This format is defined by the sensible practical standard, ISO 8601. The T separates the date portion from the time-of-day portion. The Z on the end means UTC (that is, an offset-from-UTC of zero hours-minutes-seconds). The Z is pronounced "Zulu". java.time The old date-time classes bundled with the earliest versions of Java have proven ...

## **How do I get the current date in JavaScript? - Stack Overflow**

Use new Date() to generate a new Date object containing the current date and time.

## **How do I format a date in JavaScript? - Stack Overflow**

How do I format a Javascript Date object as a string? (Preferable format: 10-Aug-2010)
