Construction Estimating Program | Takeoff Software | Dindo

No matter your role or the size of your project, Dindo makes estimating simple. With powerful, easy to use tools, you'll have full control of your estimates - so you can focus on what really matters.

Contact Us - Dindo

Dindo delivers powerful real-time takeoff and estimating - at less than \$3 a day and with no lock-in contracts. Only pay for the features you use, and nothing you don't.

Everything you need to estimate smarter - Dindo

With Dindo, you can collaborate with your team in real time, from anywhere. Assign tasks, set due dates, and keep everyone on the same page, no more second-guessing who's doing what, when, or why.

Why Subcontractor Comparison Is Critical in Construction Projects - Dindo

Unlike bolt-on systems, Dindo is the only native platform where estimating and subcontractor comparison work live and stay in sync. Your estimate drives your comparison, and your comparison updates your estimate instantly, eliminating double handling and broken links.

Construction Management Software For Home Builders - Dindo

Whether you're building custom homes or managing high volume residential projects, Dindo is designed to make your estimating process faster, easier, and more reliable.

Dindo pricing - no hidden costs

Thanks to Dindo, we're not just delivering estimates—we're driving growth, lifting margins, and building stronger teams. If you're not using Dindo, you're too slow. This software has made pricing work an exciting and enjoyable experience, take on new opportunities, and, most importantly, make money.

Advanced Carpentry Estimating Software for Construction ... - Dindo

By simplifying the process of task estimations, Dindo ensures thoroughness and precision in every project. With integrated takeoff, real-time collaboration, and an intuitive interface, Dindo is an all-

encompassing tool for construction estimating.
