Emergency care - World Health Organization (WHO)

Emergency care is powerfully aligned with the primary health care agenda as it provides first contact clinical care for those who are acutely ill or injured. Pre-hospital and facility-based emergency care is a high impact and cost-effective form of secondary prevention.

WHO's Health Emergency Appeal 2025

WHO's health emergency appeal identifies the critical priorities and resources required to address 42 ongoing health emergencies, including 17 Grade 3 crises – the most severe. These emergencies demand a coordinated, well-resourced global response to save lives, protect health, and restore hope to communities on the brink.

Emergency Care Toolkit - World Health Organization (WHO)

The WHO Emergency Care Toolkit (ECT) is an open access bundle of interventions, developed to be implemented in emergency units within hospitals, particularly in resource limited settings. The main aim of the ECT is to support systematic care of the acutely ill and injured within hospitals. These tools have been implemented in multiple resource settings and have a significant impact on ...

WHO's Health Emergency Appeal 2025

Increasingly intense and prolonged humanitarian crises require urgent action to protect the world's most vulnerable. In 2025, an estimated 305 million people will require humanitarian assistance. The growing scale of global challenges – such as the climate crisis, conflict, and infectious disease outbreaks – is outpacing available resources.

WHO launches US\$ 1.5 billion Health Emergency Appeal to tackle ...

In response, the World Health Organization (WHO) is calling for US\$ 1.5 billion for its 2025 Health Emergency Appeal (HEA), to support life-saving health interventions worldwide.

World Health Organization Emergencies Programme

National health emergency alert and response framework This multi-hazard Health Emergency Alert and Response Framework provides guidance for coordinating emergency response in countries, under the global Health...

Progress on emergency, critical and operative care

WHA 76.2 “Integrated emergency, critical and operative care for universal health coverage and protection from health emergencies,” passed with unanimous support during the 76th World Health Assembly in 2023, represented a powerful call for near-term action to strengthen health systems for delivery of high-quality emergency, critical and operative (ECO) care. In 2024, WHA 77(8) built on ...

Health emergencies

I Emergency Operations I Emergency Preparedness Health Security Preparedness The Health Security Preparedness mission is to enable countries to apply evidence-based data and actions in strengthening and sustaining functional capacities to prevent, detect and respond to public health emergencies.

Emergency response framework (ERF), Edition 2.1

The ERF provides WHO staff with essential guidance on how the Organization manages the assessment, grading and response to public health events and emergencies with health consequences, in support of Member States and affected communities.

Nepal strengthens emergency care systems with WHO's Global Emergency ...

Nepal has made significant strides in enhancing its emergency health-care systems by implementing the World Health Organization's (WHO) Global Emergency and Trauma Care Initiative (GETI). Launched in 2016, the initiative aims to deliver quality emergency care, improve system efficiencies and increase health outcomes while strengthening policies and preparedness for health emergencies. Building ...
