calculus - Difference between functional and function. - Mathematics ...

The question was difference between function and functional not definition of functional. I guess the difference is when we refer to functional we mean a set of possible functions; but when we say function we mean a specific function not a set of functions.

What is the difference between an function and functional?

Can someone give an example that would point out the difference between a function and a functional in a very simple way?

Functional dyspepsia - Symptoms and causes - Mayo Clinic

Overview Functional dyspepsia is a term used to describe a lingering upset stomach that has no obvious cause. Functional dyspepsia (dis-PEP-see-uh) also is called nonulcer dyspepsia. Functional dyspepsia is common. It is a constant condition, but symptoms don't happen all the time. Symptoms are like those of an ulcer. They include pain or discomfort in the upper belly, bloating, belching and ...
