What Are the Moon's Phases? - NASA Space Place

Learn about the Moon's phases! Why does this happen? The shape of the Moon isn't changing throughout the month. However, our view of the Moon does change. The Moon does not produce its own light. There is only one source of light in our solar system, and that is the Sun. Without the Sun, our Moon would be completely dark. What you may have heard referred to as "moonlight" is actually ...
