Portal Log-ins - Guilford County Schools

The Student Portal contains helpful videos and instructions for getting help. Staff must log in with their normal GCS username and password to access the secure Employee Portal. [Click here](#) if you need help resetting your password

Glasgow Coma Scale (GCS) - MDCalc

The Glasgow Coma Scale (GCS) estimates impaired consciousness and coma severity based on response to defined stimuli including Eye, Verbal, and Motor criteria.

Glasgow Coma Scale (GCS): What It Is, Interpretation & Chart

The Glasgow Coma Scale (GCS) is a system to “score” or measure how conscious you are. It does that by giving numbered scores for how awake you are, your level of awareness and how you respond to basic instructions.

Glasgow Coma Scale - Wikipedia

The Glasgow Coma Scale^[1] (GCS) is a clinical diagnostic tool widely used since the 1970s to roughly assess an injured person's level of brain damage. The GCS diagnosis is based on a patient's ability to respond and interact with three kinds of behaviour: eye movements, speech, and other body motions.

Glasgow Coma Scale - Osmosis

The Glasgow coma scale (GCS) is a 15-point scale used to assess the level of consciousness of individuals at risk of neurological deterioration, especially after a head trauma.

Understanding the Glasgow Coma Scale - MedicTests

The Glasgow Coma Scale (GCS) describes an individual's level of consciousness. It is often used to gauge the severity of an acute brain injury due to trauma or medical reasons.

Glasgow Coma Scale (GCS) - UpToDate

The GCS is scored between 3 and 15, 3 being the worst and 15 the best. It is composed of three parameters: best eye response (E), best verbal response (V), and best motor response (M).

Glasgow Coma Scale

Download the Assessment Aid to this new structured approach. Identify any factors that might interfere with your assessment. Observe for spontaneous behaviours in any of the three components of the GCS. Verbal and physical stimuli will be needed in patients without spontaneous behaviours.

Glasgow Coma Scale (GCS) and Brain Injury Severity

The standard GCS is not always suitable for young children who cannot yet speak or follow commands. For this reason, clinicians use the Pediatric Glasgow Coma Scale (PGCS), which adapts verbal and motor criteria to developmental stages.

Glasgow Coma Scale (GCS) • LITFL • CCC Trauma

The GCS is a neurological scoring system used to assess conscious level after head injury. Teasdale and Jennet invented the GCS in 1974.
