Grid - CSS Reference

Shorthand property for grid-row-start grid-column-start grid-row-end and grid-column-end. The grid item's column and row starts and ends are automatically set. You can use an area name.

CSS Grid Handbook - Complete Guide to Grid Containers and Grid Items

A grid container (the large yellow area in the image) is an HTML element whose display property's value is grid or inline-grid. Grid items (the smaller boxes within the yellow container) are the direct children of a grid container.

What is CSS Grid Layout?

Grid is for two-dimensional layouts. It can be used as a low-powered flexbox substitute (we're trying to make sure that a single-column/row grid acts very similar to a flexbox), but that's not using its full power.
