Stool color: When to worry - Mayo Clinic

Stool color is generally influenced by what you eat as well as by the amount of bile — a yellow-green fluid that digests fats — in your stool. As bile travels through your digestive tract, it is chemically altered by enzymes, changing the colors from green to brown. Ask a healthcare professional if you're concerned about your stool color.

Color blindness - Symptoms and causes - Mayo Clinic

Color blindness is usually inherited, meaning it's passed down through families. Men are more likely to be born with color blindness. Most people with color blindness can't tell the difference between certain shades of red and green. Less commonly, people with color blindness can't tell the difference between shades of blue and yellow. Certain eye diseases and some medicines also can cause ...

Discolored semen: What does it mean? - Mayo Clinic

Yellow or green semen. Semen can look more yellow as a person gets older. Other causes could be an infection, jaundice, or a side effect of taking medicine that turns the semen yellow or green. Brown or black semen. Semen that is black or brown commonly means old blood is present.

Acute sinusitis - Symptoms and causes - Mayo Clinic

Overview Acute sinusitis causes the spaces inside the nose, known as sinuses, to become inflamed and swollen. Acute sinusitis makes it hard for the sinuses to drain. Mucus builds up. Acute sinusitis can make it hard to breathe through the nose. The area around the eyes and the face might feel swollen. There might be throbbing face pain or a headache.

Bronchitis - Symptoms and causes - Mayo Clinic

Symptoms If you have acute bronchitis, you may have cold symptoms, such as: Cough Production of mucus (sputum), which can be clear, white, yellowish-gray or green in color — rarely, it may be streaked with blood Sore throat Mild headache and body aches Slight fever and chills Fatigue Chest discomfort Shortness of breath and wheezing

Urine color - Symptoms and causes - Mayo Clinic

Urine can turn green due to a medicine for pain and arthritis symptoms called indomethacin (Indocin, Tivorbex). Green urine also can be caused by propofol (Diprivan), a strong medicine that helps people sleep or relax before surgery. Health problems. A rare disease called familial benign hypercalcemia can cause children to have blue urine.

Holiday green bean casserole - Mayo Clinic

Green bean casserole is a holiday favorite, but this version uses homemade white sauce instead of canned soup to cut the salt without giving up flavor.
