Leak troubleshooting - Trouble Free Pool

I posted earlier this year about our builder abandoning job and having to figure out how to get things finished. We are in pretty good shape now, but it...

Hayward omni update - Trouble Free Pool

I assume at this point I have to do the update by USB. Can someone guide me on the steps? I am terrified to mess it up because clearly my builder won't rush out to help me if I do! I already did the backup file on a USB!

Vacuum to waste or filter - Trouble Free Pool

Hi all! Glad to be posting again after what felt like an endless winter. Took the cover off today, got the pump and filter up and running. As expected pool is pretty filthy. Scooped out as much solid material as I could, letting the S200 take a few passes but I suspect I need to use the pump...

Not exactly closing the pool but starting over in colder weather and ...

This summer was our first season with an AG pool, and it turned out the foundation was not level, but we kept it up for use over the summer and just kept the water level lower than it could have been. Over the past few weeks, we drained it, hired someone to level everything, and then we put the...

Owner Build in the UK - Under Floor Insulation Question

I have a question on a small pool I am building in my garden in the UK. It is more paddling pool sized. 5m x 3m x 1.2m internal. It will be constant depth and heated.

Pool floated out of ground - News Story | Trouble Free Pool

In case no one has ever seen a pool floated out of the ground or does not know the dangers of just draining your pool without knowing what to do...

Skimmer part identification - Trouble Free Pool

Hi everyone, I am new to Trouble Free Pool but have had a pool for 10 years mostly trouble free. Last year I ran out of time and had a pool company close my pool, never again. They left a bunch of leaves and garbage on the bottom and when I called them this spring they said it must have blown in...

ORP and Bromine - Trouble Free Pool

I understand that ORP measurements are not reliable for determining the chlorine concentration in swimming pools and spas due to cyanuric acid presence. In case of using bromine for sanitizing a swimming pool or a spa and cyanuric acid is not present, is it then possible to use the ORP...
