## **Dissociative identity disorder - Wikipedia**

In controlled studies, non-specialised treatment that did not address dissociative self-states did not substantially improve DID symptoms, though there may be improvement in patients' other conditions.

## **Dissociative Identity Disorder (DID): Symptoms & Treatment**

Dissociative identity disorder (DID) is a mental health condition where you have two or more separate personalities that control your behavior at different times.

## **Dissociative Identity Disorder (Multiple ... - Psychology Today**

Dissociative identity disorder (DID) is a rare condition in which two or more distinct identities, or personality states, are present in—and alternately take control of—an individual.

## **Dissociative Identity Disorder (Multiple Personality Disorder)**

If you have DID, you may find yourself doing things you wouldn't normally do, such as speeding, reckless driving, or stealing money from your employer or friend.

## **DID: Types, Symptoms, Causes, Diagnosis, Treatment, and More**

Severe and repetitive childhood trauma often causes dissociative identity disorder (DID). You can have multiple identities that function independently if you have DID.

## **Dissociative Identity Disorder (DID): Myths vs. Facts**

Dissociative identity disorder (DID) comes with a lot of stigma and misunderstanding. Let's bust some common myths.

## **Dissociative Identity Disorder (DID): Symptoms, Test ...**

DID often co-occurs with other emotional conditions, including posttraumatic stress disorder (PTSD), borderline personality disorder (BPD), and a number of other personality disorders, as well as conversion disorder.
