HWiNFO - Free System Information, Monitoring and Diagnostics

Free Hardware Analysis, Monitoring and Reporting. In-depth Hardware Information, Real-Time System Monitoring, Reporting & more

Question - Tom's Hardware Forum

HWmonitor, Open hardware monitor, Realtemp, Speccy, Speedfan, Windows utilities, CPU-Z, NZXT CAM and most of the bundled motherboard utilities are often not the best choice as they are not always accurate. Some are actually grossly inaccurate, especially with certain chipsets or specific sensors that for whatever reason they tend to not like or work well with. I've found HWinfo or CoreTemp to ...

Free Download HWiNFO Sofware | Installer & Portable for Windows, DOS

Start to analyze your hardware right now! HWiNFO has available as an Installer and Portable version for Windows (32/64-bit) and Portable version for DOS.

About HWiNFO Software - Professional System Information & Diagnostics

Comprehensive Hardware Information Exhaustive information about hardware components displayed in hierarchy unfolding into deep details. Useful for obtaining a detailed hardware inventory report or checking of various hardware-related parameters.

AMD driver won't load after update to Windows 11 24H2 - Tom's Hardware ...

Did you force update? Or was updating to 24H2 in your Windows update? 24H2 doesn't mix well with games and gamers it seems. There are lots of reports that the update is being kept from users who have certain games installed, as they are getting BSODs a lot. When I tried one of the earlier releases (which are known to be buggy), it nerfed my BF2042 game. It just wouldn't run, regardless of ...

[SOLVED] - CPU Usage is always at 100% - Tom's Hardware Forum

My CPU seems to recently running at a solid 100% in Task Manager even when nothing is running. All other statics look fine - memory running at 20%. Its not against any specific process the CPU loading it just seems to be the latest used. My specification is as follows: - Intel Core i7-13700K -...

[SOLVED] - 9070 XT runs terrible ? | Tom's Hardware Forum

I upgraded from my 3060 Ti to a 9070 XT, but I've noticed worse performance in games (70fps on medium settings). For example, in Cyberpunk 2077, the GPU load is at 80%, and the card is drawing a maximum of 100W, typically running at 80W. Strangely, during loading screens, the power spikes up to...

[SOLVED] - Unable to activate Windows after ... - Tom's Hardware Forum

Hi, I just upgraded my Motherboard and CPU and now I can't activate the Windows, I have tried the following steps: Sign in as an administrator. Select the Start button, then select Settings > System > Activation > Troubleshoot . The troubleshooter will show Windows can't be activated on...
