Question - Tom's Hardware Forum

HWmonitor, Open hardware monitor, Realtemp, Speccy, Speedfan, Windows utilities, CPU-Z, NZXT CAM and most of the bundled motherboard utilities are often not the best choice as they are not always accurate. Some are actually grossly inaccurate, especially with certain chipsets or specific sensors that for whatever reason they tend to not like or work well with. I've found HWinfo or CoreTemp to ...

[SOLVED] - CPU Usage is always at 100% - Tom's Hardware Forum

My CPU seems to recently running at a solid 100% in Task Manager even when nothing is running. All other statics look fine - memory running at 20%. Its not against any specific process the CPU loading it just seems to be the latest used. My specification is as follows: - Intel Core i7-13700K -...

Question - Identifying hardware associated with older Windows drives ...

Hi, I have some older Windows (XP, 7, 10) platter primary (C:\) HDDs from different old computers

of mine. Unfortunately, the stickers got removed so I no longer know what motherboard each drive was associated with originally. Is the identifying information for the original hardware...

AMD driver won't load after update to Windows 11 24H2 - Tom's Hardware ...

Did you force update? Or was updating to 24H2 in your Windows update? 24H2 doesn't mix well with games and gamers it seems. There are lots of reports that the update is being kept from users who have certain games installed, as they are getting BSODs a lot. When I tried one of the earlier releases (which are known to be buggy), it nerfed my BF2042 game. It just wouldn't run, regardless of ...

Question - Realtek Gaming 2.5GbE Family Controller has a Hardware IO ...

2.5GbE motherboard chipsets from Realtek and Intel are well known for instability problems. Try the Realtek web site and see if you can find a more recent driver than the ones on your motherboard web site. I disabled the 2.5GbE chipset in the BIOS on my motherboard and installed a 10GbE PCIe NIC instead (I have two 10GbE LANs).
