Win7 OEM DVD Reuse - Microsoft Community

In your case, what probably happened is, you bought an MSDN licensed key, which carries up to 10 activations unlike full packaged retail licenses which only carry 1 activation.

Restore Default Configuration - Microsoft Community

A computer's hard disk can fail at any time, without warning, wiping out all of your files. I recommend that you back up your files to an external medium right now! You need a backup even if you're not planning to restore the computer. A startup option called "restore default configuration" almost certainly restores the computer to factory settings. What brand of computer is it? What does the ...

Transfer license to another computer - Microsoft Community

However, If you bought a digital license key separately, the product key is in the confirmation email you received after buying your digital copy of Windows. Microsoft only keeps a record of product keys if you purchased from the Microsoft online store. You can find out if you purchased from Microsoft in your Microsoft account Order history.
