Do infrared saunas have any health benefits? - Mayo Clinic

An infrared sauna is a type of sauna that uses light to make heat. This type of sauna is sometimes called a far-infrared sauna. "Far" describes where the infrared waves fall on the light spectrum. A regular sauna uses heat to warm the air, which in turn warms your body. An infrared sauna heats your body directly without warming the air around you.

Hemorrhoids - Diagnosis and treatment - Mayo Clinic

Coagulation. Coagulation techniques use laser or infrared light or heat. They cause small, bleeding internal hemorrhoids to harden and shrivel. Coagulation has few side effects and usually causes little discomfort. Surgical procedures Only a small percentage of people with hemorrhoids need surgery to remove them.

How to take your temperature - Mayo Clinic

A digital ear thermometer uses an infrared ray to measure the temperature inside the ear canal. Turn on the digital thermometer. Gently place it in your ear canal no further than indicated by the

instructions that came with the device. Hold the thermometer tightly in place until you hear the thermometer beep indicating it's done. Remove the thermometer and read the number.

Seasonal affective disorder treatment: Choosing a light box

Seasonal affective disorder (SAD) is a type of depression that typically occurs each year during fall and winter. Use of a light box can offer relief. But for some people, light therapy may be more effective when combined with another SAD treatment, such as an antidepressant or psychotherapy, also called talk therapy.
