2026 ICD-10-CM Diagnosis Code

O03.9 is a billable/specific ICD-10-CM code that can be used to indicate a diagnosis for reimbursement purposes. Short description: Complete or unsp spontaneous abortion without complication

Here's the Secret to Coding Abortions: Determining the Type - AAPC

When determining the correct CPT® code for treating a nonelective abortion, the first question you should ask is whether the ob-gyn performed surgery to complete the process. If the patient presents with a complete spontaneous abortion, no products of conception remain in the uterus.

ICD-10-CM Codes for Abortion-Related Services

ICD-10-CM Codes for Abortion-Related Services This list contains principal diagnosis codes for abortion and abortion-related services.

2026 ICD-10-CM Diagnosis Code O03.9

O03.9 is a billable diagnosis code used to specify a medical diagnosis of complete or unspecified spontaneous abortion without complication. The code is valid during the current fiscal year for the submission of HIPAA-covered transactions from October 01, 2025 through September 30, 2026.

The Medicine and ICD-10 Coding of Abortion - ICD10monitor

An "inevitable abortion" is the scenario when the cervix has dilated in preparation for expulsion, but has not yet done so. For some coding reason unfathomable to me as a clinician, inevitable abortion indexes to O03.4, Incomplete spontaneous abortion without complication.

Abortion - AI-Powered ICD-10 Documentation

Find comprehensive information on abortion, also known as termination of pregnancy or spontaneous abortion, including clinical documentation, medical coding, healthcare procedures, and relevant resources for medical professionals.

Inevitable Abortion Icd 10

Note: The ICD 10 classification does not have a distinct code explicitly labeled "inevitable abortion." Instead, clinicians often use codes related to spontaneous or incomplete abortion, with additional documentation indicating the clinical scenario as inevitable.
