searchbar on the taskbar keeps crashing and my GPU reaches 100% ...

searchbar on the taskbar keeps crashing and my GPU reaches 100% utilisation Hi. My searchbar on the taskbar keeps crashing whenever I try to use it and my GPU reaches 100% utilisation. This also happens with the search bar in settings. How can I fix this? It only started recently I believe, so it must be something I've added or changed.

Hiding the taskbar in Windows 10 - Microsoft Community

After updating to Windows 10, I want to hide the bottom taskbar on my Surface Pro 3. One, right click does not bring up the ability to auto hide the taskbar, just pin. The taskbar covers the bottom of

edge task bar icon missing - Microsoft Community

Edge calculator and store icon missing but you can still click on them and they work, this happened after the Microsoft 1709 update for w10

Turned computer off in the middle of system restore to retry and I am ...

What should I do next to repair/restore my computer? I turned off my computer in the middle of system restore. Now system restore states Resource Loader Failed to find MUI file (0X80073AFC). Teenagers made changes to my taskbar and I could not figure out how to undo their changes so I decided to use the system restore feature.

Windows 10- laptop not functioning properly, I can't find a solution ...

Once today it let me click the taskbar without causing issues, however nothing opened when i clicked on app icons. Not even the windows icon on the bottom left works. Besides that, I am also not given a login page before the desktop, therefore I am not able to press shift and restart. I was not given the chance to create an account or password.

WATCHDOG ERROR CODE - Microsoft Community

Getting a blue screen upon start up of my PC at least 5 times before it lets me log in and use it just fine. I have windows 10

Windows 10 shuts down automatically - Microsoft Community

Hello, Microsoft Engineers!!! My PC running on Windows 10 automatically shuts down and I am fed up from it. Please give permanent solution for it. Also for let me know why file explorer is not running

Taskbar on left side; Few issues. - Microsoft Community

Taskbar on left side; Few issues. For productivity reasons, I have locked my taskbar to the left side of my screen. There are two issues I'm facing now: 1) A few of my notifications will pop up in very incorrect places. Since my icons are now in the bottom left corner I expected my notifications to pop up in the bottom left corner.

Windows 10 taskbar shrinks by itself after wakeup

Windows 10 taskbar shrinks by itself after wakeup I thoroughly searched everywhere and didn't find a solution, so I post it here, starting with long explanation. I have Windows 10, upgraded from Windows 8.1 Pro, which, in it's time, was upgraded from stock Windows 8.
