Error [ERR_REQUIRE_ESM]: require() of ES Module not supported

308 This question already has answers here: Error: require () of ES modules is not supported when importing node-fetch (15 answers)

Error [ERR_MODULE_NOT_FOUND]: Cannot find module

Answer 1 This answer does not require using a runtime flag `--es-module-specifier-resolution=node` at execution time However, you have to modify your ts source code, which is a pain if there is a lot of files. And, the modified files will no longer compile in "commonjs" mode, if you want to go back or use dual "commonjs"/"module" modes. Modify your tsconfig.json to ensure at least these ...

gcc - make: *** [] Error 1 error - Stack Overflow

An example of this is a missing header file - the compiler says something like "no such file" but not "error: no such file", then it exits with non-zero exit code some time later (perhaps after many more warnings).

javascript - Axios POST request fails with error status code 500 ...

The webpage discusses how to resolve a 500 internal server error when making a POST request using Axios in JavaScript.

.net - Compiler Error Message: The compiler failed with error code ...

This one seems to be originated after upgrading from vs2015 to vs2017. The error is Compiler Error Message: The compiler failed with error code -532462766. Some notes ...

usb - device descriptor read/64, error -110 - Stack Overflow

I have a storage server running openmediavault which is based on debian. The OS is in a USB 3.0 Stick plugged directly on the motherboard (no USB-Hub or sth). The system was running fine for about 3

Why am I getting "Data source name not found and no default driver ...

When trying to make a program on Windows that connects to a database via ODBC, I got the following error: [Microsoft] [ODBC Driver Manager] Data source name not found and no default driver specified.

How can I avoid 'cannot read property of undefined' errors?

You can't safely nest this as deeply as you want. What if window.b is undefined? You will get a type error: Cannot use 'in' operator to search for 'c' in undefined

SQL Error: 0, SQLState: 08S01 Communications link failure

2013-05-08 16:44:35,786 ERROR (JDBCExceptionReporter.java:101)

[org.hibernate.util.JDBCExceptionReporter, logExceptions] - Communications link failure The last packet sent successfully to the server was 0 milliseconds ago.

authentication - LDAP: error code 49 - Stack Overflow

LDAP: error code 49 - 80090308: LdapErr: DSID-0C0903A9, comment: AcceptSecurityContext error, data 52e, v1db1 I know "52e" code is when username is valid, but password is invalid.
