Important Update: LogMeIn Rescue's Website is Moving

To Our Valued Customers, We wanted to let you know that LogMeIn Rescue will soon have a new home. Rescue's website will be soon moving to logmein.com This update only affects Rescue's marketing website -- the product will not be impacted so most customers won't need to take any action. However, there are a few important details we want you to be aware of.

Breaking News: WebTC features you've been waiting for!

They simply have to click on the link they get from the technician or enter the PIN on logmein123.com and will be connected. As soon as the end user gives their consent, the agent can see their screen and provide support.

Question regarding access to computer - GoTo Community - 291513

After they managed to solve my problem, the file I downloaded was gone and out of nowhere I had

"logmein123" marked as a bookmark on the chrome browser. I'm wondering if there's any way to know if they can still access my computer, since there's nothing to uninstall and I can't know for sure if they logged out from my computer.

Windows Defender Firewall issue | GoTo Community - 280711

Hello, Remote users are getting a Windows Defender Firewall prompt about the Rescue applet when I start a connection. Hoping you can guide me to a fix. Here are the details... Users have an AD-joined local account with no admin permissions. They download and run the applet with the 6 digit pin as normal. I'm putting in the local admin password at the Rescue connect screen and elevating the ...

Can you try having the end user enter the pin on beta.logmein123.com which contains a version of the applet with the fix? The scheduled release for this is next week, but please let us know if the beta works or not.

Logmein Client An error Occurred | GoTo Community - 302584

Hello there! To fix the error, please follow these steps: first, try opening the LogMeIn Client. Then, click on "View", followed by "Options", and select "Delete all stored login credentials". After that, restart your system. This should resolve the issue and ensure that the "Remember me" option is unchecked during login.
