Global migration, by the numbers | World Economic Forum

Here's how While the overall figure has remained relatively stable as a proportion of the global population, the numbers from the World Migration Report 2020, published by the International Organization for Migration (IOM), clearly demonstrate the impact that events of the past two years have had on the movement of people around the world.

E-migration is helping to fill gaps in global talent

E-migration lets talented professionals contribute to global initiatives without leaving their communities - and major companies are taking advantage of it.

Why it's time to rethink migration - The World Economic Forum

It is time to rethink migration. Over much of the world, birth rates are plunging and populations are ageing. This means that there will be fewer workers to support older people and growth. And this means that most countries will increasingly need to rely on migration. Making the most of migration through smart policies is essential for global development and a prosperous future. And the ...

We need strategic solutions for internally displaced persons

Internally displaced people outnumber those displaced across borders. We need solutions to facilitate action for IDPs, while also preventing displacement.

Why migration is a model for sustainable development for all

Migration as a major driver of development For centuries, migration has been a major driver of development and prosperity. International remittances to low- and middle-income countries are now at about \$670 billion, which is more than direct foreign investment and far more than official development assistance to those countries.

Migration is a global strategic asset. We must not undermine it

The narrowing migration pathways over the last decade, together with the global transformations underway, are placing one of the world's most strategic global assets at increasing risk. International migration as part of a global system of peace, prosperity and equality is more important than ever before but increasingly overlooked and ...

4 ways to prevent and manage climate migration

Four strategies addressing climate migration – from early warning systems to planned relocation – that protect vulnerable communities worldwide.

5 key predictions for the future of city talent migration

Migration is set to increase but what that looks like is likely to change and will lead cities to fight for residents as "cities of choice" are sought.

How immigration has changed the world – for the better

There are, however, legitimate concerns about large-scale migration. The possibility of social dislocation is real. Just like globalization – a strong force for good in the world – the positive aspects are diffuse and often intangible, while the negative aspects bite hard for a small group of people. Yes, those negative aspects must be managed.

How AI can help combat mis- and disinformation about migration

International migration boosts labour markets, entrepreneurship and cultural diversity in our increasingly globalized world. But mis- and disinformation campaigns can seek to exploit social anxieties and amplify false narratives about migration. Artificial Intelligence (AI) often underpins such campaigns but it can also be used to amplify true stories about migration.
