Nursing and midwifery - World Health Organization (WHO)

Nursing and midwifery Despite the critical role they play in health care, there is a shortage of nurses worldwide that is expected to rise as the population grows. Initiatives to expand health care services, particularly in low- and middle-income countries, are succeeding in providing access to previously underserved communities, which furthers the need for trained nurses. Every country needs ...

Nursing and midwifery - World Health Organization (WHO)

Nursing and midwifery occupations represent a significant share of the female workforce. More than 80% of the world's nurses work in countries that are home to half of the world's population.
