How Many Planets are in our Solar System? | Facts & Amount

A star that hosts planets orbiting around it is called a planetary system, or a stellar system, if more than two stars are present. Our planetary system is called the Solar System, referencing the name of our Sun, and it hosts eight planets. The eight planets in our Solar System, in order from the Sun, are the four terrestrial planets Mercury, Venus, Earth, and Mars, followed by the two gas ...

The Planets In Order | From The Sun, Information, History & Definition

The planets in order from the Sun based on their distance are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Click for more.

Solar System Facts | Information, Size, History and Definition

The solar system consists of the Sun; the eight official planets, at least three “dwarf planets”, 130+ satellites and a large number of small bodies

The Planets | Facts About the Eight Planets & 5 Dwarf Planets

The Planets of the Solar System Detailed information and facts about the eight planets and five dwarf planets in our solar system.

Mercury Facts | Information, History, Location, Size & Definition

Mercury is the closest planet to the Sun but, perhaps surprisingly, it does not have the highest temperatures. Click for even more facts.

Saturn Facts | Surface, Atmosphere, Moons, History & Definition

Saturn is the sixth planet from the sun, with the largest planetary rings in the Solar System. Click for even more facts and information on Saturn.

Earth Facts | Surface, Atmosphere, Satellites, History & Definition

Earth is the third planet from the Sun and the fifth largest planet in the Solar System with the highest density. Click for even more facts and information.

Neptune Facts | Temperature, Surface, Information, History & Definition

Neptune is the fourth largest and the farthest planet of the Solar System with the most powerful wind speeds out of all the planets. Click for more facts.

Mars Facts | Temperature, Surface, Information, History & Definition

Mars is the fourth planet from the Sun and the second-smallest planet with a thin atmosphere. Click for even more wonderful Mars facts.
