Extract Value from Array in Power Automate Asked 1 year, 2 months ago Modified 10 months ago Viewed 7k times

power automate - How to write Search Query in Get Emails (v3)? - Stack ...

I am writing a Power automate to copy emails from an Outlook mailbox to SharePoint. I am using Get emails (V3) and want to retrieve emails received on a particular date.

formatDateTime in Power Automate Desktop - Stack Overflow

You are confusing Power Automate with Power Automate Desktop. The link you provide is for Power Automate, so those functions won't work in the PADesktop. There is an action named Convert datetime to text in PAD, you can specify the formats you would like there The action lets you pick from existing formats or you can specify one. copy this code to PAD to see a custom example Text ...

Power Automate - Some SharePoint List Columns Not Appearing in "Update ...

I'm working on a Power Automate flow that updates items in a SharePoint Online list. However, I'm facing an issue where certain columns (including Person/Group fields) are not appearing in the "Update item" action.

power automate - Why doesn't the "Get file content" action get the file ...

0 Creating a flow in Power Automate: New Step Choose the OneDrive "Get file content" action File = /Documents/Folder/File.json Infer Content Type = Yes New Step Choose the Data Operation "Parse JSON" action Generate from Sample Paste the file contents Done When I test the flow, the "Parse JSON" step fails with BadRequest.

Running Python scripts in Microsoft Power Automate Cloud

I use Power Automate to collect responses from a Form and send emails based on the responses. The main objective is to automate decision-making using Python to approve or reject the form. I am aware...

powerbi - Can a Power BI dataset query be used as a data source in a ...

In Power Automate, within the Power BI connector, you'll find the "Run a query against a dataset" action. Take note: this can only return one table at a time with max of 1,000 rows.

Create HTML table from array of Objects in Power Automate

Create HTML table from array of Objects in Power Automate Asked 1 year, 3 months ago Modified 1 year, 3 months ago Viewed 7k times

Power Query code to refer to another query (and how buffering works)

Is this just part of the building process? Or If I have one query A that loads across the network and 5 follow up queries that refer to query A will power query / excel be reading the across the network 1 time or five times? What is the proper way in Power Query to refer to an existing query and reduce data pulls across the network?

Get email categories in Microsoft Power Automate - Stack Overflow

But in Power Automate, if I use the "Send an HTTP Request" action (under "Office 365 Outlook") and send a request to that same endpoint, it returns a lot of the message information but not the categories. I have also tried the "Get Email (V2)" and "Get Emails (V3)" actions, neither of them includes categories in the output either.
