Classical conditioning - Wikipedia

Classical conditioning (also respondent conditioning and Pavlovian conditioning) is a behavioral procedure in which a biologically potent stimulus (e.g. food, a puff of air on the eye, a potential rival) is paired with a neutral stimulus (e.g. the sound of a musical triangle).

Classical Conditioning: How It Works With Examples

Classical conditioning (also known as Pavlovian or respondent conditioning) is learning through association and was discovered by Pavlov, a Russian physiologist. In simple terms, two stimuli are linked together to produce a new learned response in a person or animal.

PAVLOVIAN Definition & Meaning - Merriam-Webster

The meaning of PAVLOVIAN is of or relating to Ivan Pavlov or to his work and theories. How to use Pavlovian in a sentence.

Pavlovian conditioning | behavioral psychology | Britannica

Pavlovian conditioning, a type of conditioned learning which occurs because of the subject's instinctive responses, as opposed to operant conditioning, which is contingent on the willful actions of the subject.

Pavlovian Response: Definition and Examples (2026)

Pavlovian response, also known as classical conditioning or respondent conditioning, is a type of learning process where an individual develops an involuntary response to a given stimulus. This form of learning was initially proposed by the Russian psychologist Ivan Pavlov in the early 1900s.

Pavlov's Dog: Pavlov's Theory of Classical Conditioning

Pavlov's dog experiments played a critical role in the discovery of one of the most important concepts in psychology: Classical conditioning, sometimes called Pavlovian conditioning.

Pavlov Conditioning: From Dogs to Humans Explained

From salivating dogs to human behavior modification, the pioneering work of Ivan Pavlov has left an indelible mark on the world of psychology and beyond. The mere mention of his name conjures images of eager canines and ringing bells, but Pavlov's legacy extends far beyond these simple associations.

PAVLOVIAN Definition & Meaning | Dictionary.com

PAVLOVIAN definition: of, relating to, or characteristic of Pavlov or his work, especially of experiments in which he elicited predictable responses from laboratory animals. See examples of Pavlovian used in a sentence.

What Is the Pavlovian Effect and How Does It Work?

The Pavlovian effect, formally known as classical conditioning, describes a fundamental type of learning. This process involves forming an association between two distinct stimuli. Through repeated pairing, an organism learns to anticipate an event based on a previously unrelated cue.

Classical Conditioning: Exploring Pavlov's Famous Experiment

What Is Classical Conditioning? Classical conditioning, also called Pavlovian conditioning or respondent conditioning, is learning through association.
