Unable to print. Rendering failed. - HP Support Community

A couple of months ago, I bought a new HP OfficeJet Pro 8124e printer. It was printing perfectly until today, when every single document I tried to print failed, saying, "Unable to print. Rendering failed." I have done all of the following, and nothing works: * run diagnostics through HP App and t...

Python: % operator in print() statement - Stack Overflow

Intro The % operator in python for strings is used for something called string substitution. String and Unicode objects have one unique built-in operation: the % operator (modulo). This is also known as the string formatting or interpolation operator. Given format % values (where format is a string or Unicode object), % conversion specifications in format are replaced with zero or more ...
