Tachyon 5G Single-Board Computer - Particle store

Particle is the leading integrated IoT Platform-as-a-Service for developers and enterprises to build world-class intelligent connected products. Our devices serve as the entry point to our platform as they are pre-integrated with the full capabilities of Particle PaaS.

Tachyon - Particle

Particle's customers use our platform to do everything from monitoring equipment in dentist's offices to searching for methane escapes on an oil site to tracking lobster boats off of the coast of Maine to providing access controls to gyms and breastfeeding stations.

A Full-Stack IoT Platform-as-a-Service | Particle

Particle brings the flexibility and extensibility of building IoT yourself and the dependability of using an off-the-shelf solution together into one PaaS. We handle the hard things that don't differentiate you, so you can focus on the essential things that do.

IoT Network Solutions — Products & Services | Particle

A global, scalable cellular IoT platform Whether you're connecting one or a million devices, we've got you covered. Particle provides LTE cellular coverage in over 150 countries using a comprehensive network of carriers.

Pricing - Particle

What is a Data Operation? A Data Operation is Particle's unit of measure for user-controlled activities that act upon data. Examples of these activities include publishing data from edge to cloud, or triggering a logic function that processes the corresponding data.

Support & Troubleshooting - Particle

You must log into your Particle account to use the Support & Troubleshooting tool. I need help with my Kickstarter pledge I need help with my order, and I haven't created an account yet I forgot my password and need to reset it

IoT Command Center — Particle

As a highly-extensible platform, the Particle IoT Command Center supports integrations to seamlessly connect device data with the tools your business already relies on, saving you time and money while extending the value of your existing investments.
