## **Family Sharing with Gemini Pro - Gemini Apps Community**

Family Sharing with Gemini Pro I want to know if I can share Gemini pro with my family if I purchase one subscription or do I have to buy a separate subscription for each family member.

## **Windows prompts me for credentials when sharing items**

I'm sharing files between my desktop and laptop, both on the latest version of Windows 10. Everything was working fine yesterday, but now I'm being prompted for credentials. This should happen, as I have Password-protected Sharing turned off on both PCs.

## **Turn On or Off File and Printer Sharing in Windows 10**

Printer sharing allows you to make an attached printer available to other computer users on the network. If you are connected to a public network location (ex: café or library), then you may wish to turn off file and printer sharing until you are connected to a private network location (ex: home or work).

## **Windows 10 Tutorials - Ten Forums**

This tutorial will show you how to setup and share files and folders over a network in Windows 10 and Windows 11.

## **Share Files and Folders Over a Network in Windows 10**

File sharing over a network in Windows 10 allows you to share files and folders on your computer with other users over a private or public network in your workgroup or domain. You can set the permissions of a shared file or folder to allow groups or users to have a read only, change (modify), or full control access rights.

## **Can't get Windows 10 computers to network connect with Windows 11**

Networking and sharing is the same in Windows 10 and Windows 11. This tutorial should help explain it. Share Files and Folders Over a Network in Windows 10 Sharing should be easiest if you have the same username and password on each PC. If not, then when you try to connect you will be asked for the name and password of an account on the PC you are trying to connect to. See these comprehensive ...

## **Guest sharing now available in Microsoft Loop - Ten Forums**

Guest sharing now available in Microsoft Loop We've heard from many of you that you'd love the

flexibility to work in Loop with people outside of your organizations. Now we're making that possible, with guest sharing of Loop workspaces, pages, and components.

## **Share folders in Google Drive**

More about folder sharing: When you share or change permissions on a folder, the files and subfolders inside are updated with the new sharing permissions. This ensures permission management is simple and access is consistent. Permissions from a parent folder are inherited by all the files and folders within it.

## **Network Share Access Using Different Credentials**

Sharing is set up on the computer containing the folder to be shared [you cannot make another computer's folder a shared one]. - In File explorer, right-click on the folder, Properties, Sharing tab, Advanced sharing - Set the checkbox for Share this folder - Give it a Share name - Click on Permissions,

## **Other computers not visible on network after Upgrade to Windows 11**

Make sure it's not blocking file sharing. Restart Network Discovery: Go to Control Panel > Network and Sharing Center > Change advanced sharing settings, and try turning Network discovery and File sharing off and on again.
