Solid - Wikipedia

Solid-state physics is the study of rigid matter, or solids, through methods such as solid-state chemistry, quantum mechanics, crystallography, electromagnetism, and metallurgy.

SOLID Definition & Meaning - Merriam-Webster

The meaning of SOLID is being without an internal cavity. How to use solid in a sentence.

What Is a Solid? Definition and Examples in Science

Because its particles are packed close together, a solid is rigid, doesn't flow, and isn't easily compressed. A solid is defined as a state of matter with a definite shape and volume.

Solid: Definition, Properties, Types, and Examples

It comprises particles such as atoms, ions, or molecules, packed closely together and held in fixed positions by intermolecular forces. This tight arrangement gives solids a definite shape and volume that does not easily change. Examples of solids include glass, diamond, and rubber. [1-4]

SOLID | English meaning - Cambridge Dictionary

SOLID definition: 1. hard or firm, keeping a clear shape: 2. completely hard or firm all through an object, or.... Learn more.

Solid | Definition & Facts | Britannica

Solid, one of the three basic states of matter, the others being liquid and gas. A solid forms from liquid or gas because the energy of atoms decreases when the atoms take up a relatively ordered, three-dimensional structure.

Solid - Definition, Meaning & Synonyms | Vocabulary.com

A solid, as opposed to a liquid or gas, has a size and shape to it. It doesn't flow like water or disappear into the air.

SOLID definition in American English | Collins English Dictionary

A solid is a substance that stays the same shape whether it is in a container or not. Solids turn to liquids at certain temperatures.

Solid - definition of solid by The Free Dictionary

Without a break or opening; completely or continuously: The theater was booked solid for a month.

solid - WordReference.com Dictionary of English

Physics having relative firmness, coherence of particles, or persistence of form, as matter that is not liquid or gaseous: solid particles suspended in a liquid.
