## Double Buffering - social.msdn.microsoft.com

Double buffering allows one to be filling one buffer from a peripheral while processing another buffer. When martin says stream, we are talking about roughly the same thing. A buffer is space in memory sometimes statically allocated and sometimes, dynamically allocated. A buffer might be just N bytes set aside. If you are doing block reads it's usually and integral of a block size like 2048 ...

## event id 1310 asp.net 4.0 exchange 2016

I have 6 exchange server 2016 CU11, 2 in each site. While doing my routine check i fount that OWA and ECP is not working on of exchange servers. I check event viewer and i found Event ID 1013 " event id 1310 asp.net 4.0 ", i did the following but non of them worked: 1- Copied sharedWebConfig.config file fromC:\Program Files\Microsoft\Exchange Server\V15\FrontEnd\HttpProxy directory and pasted ...

## .suo file corrupted? - social.msdn.microsoft.com

The solution user options (.suo) file is a structured storage, or compound, file stored in a binary format. You save user information into streams with the name of the stream being the key that will be used to identify the information in the .suo file. The solution user options file is used to store user preference settings, and is created automatically when Visual Studio saves a solution ...

## json serialization of parent child data records

Consider using a DataContractResolver or add any types not known statically to the list of known types - for example, by using the KnownTypeAttribute attribute or by adding them to the list of known types passed to DataContractSerializer.

## Async CTP with VS2010 SP1 - IDE Issues

Ensuring AsyncCtpLibrary.dll is properly referenced and accessible. Completely uninstalling the CTP and reinstalling it.

## C# code for Website Backlinks - social.msdn.microsoft.com

can someone provide me a c# code for 2000+ result cause i think it's more correct.

## Viewing .tga Images - social.msdn.microsoft.com

I have a program the just views images, when it tries to view .tga files, it says it's out of memory.

## Clone Build Definition - social.msdn.microsoft.com

I have a rather lengthy build definition, and I am trying to clone it (our work process requires that we have an "Release Candidate" build that goes to one place that gets built on demand while the CI builds go to another place). I have looked all over for this and can't seem to find it, even though the capability exists when connected to an on-prem TFS server. Does this not exist for VSTS? Is ...

## BMP header c# - social.msdn.microsoft.com

hi everybody, here is my question: how can i extract the header from a BMP file and then doing some operations on the body (pixels) then return the header and display the image?
