Silent heart attack: What are the risks? - Mayo Clinic

A silent heart attack is a heart attack that has few, if any, symptoms or has symptoms not recognized as a heart attack. A silent heart attack might not cause chest pain or shortness of breath, which are typically linked to a heart attack. People who have a silent heart attack might not know it ...

Absence seizure - Symptoms and causes - Mayo Clinic

Absence seizures usually can be managed with antiseizure medicines. Some children who have them also develop other seizures, such as generalized tonic-clonic seizures or myoclonic seizures. Many children outgrow absence seizures in their teens.

Myocardial ischemia - Symptoms & causes - Mayo Clinic

Myocardial ischemia reduces blood flow to the heart and may cause chest pain - but not always. Learn all the signs and symptoms and how to treat it.

Ataque cardíaco asintomático: ¿Cuáles son los riesgos?

Un ataque cardíaco asintomático es aquel que presenta pocos síntomas, si es que hay alguno, o que tiene síntomas que no se reconocen como un ataque cardíaco. Es posible que no cause dolor en el pecho ni falta de aire, que son síntomas asociados comúnmente con un ataque cardíaco. Las personas ...

Mayo Clinic investigators discover new clues to early ovarian cancer ...

These findings provide insights for a cancer known for nonspecific symptoms and challenging detection until the malignancy has advanced, says Dr. Walther-Antonio. "Ovarian cancer is a silent cancer," she says. "We don't see early ovarian cancer often when the microbiome markers are stronger. It's difficult to diagnose early. By the time patients experience symptoms, it's often advanced." Dr ...

Barrett's esophagus - Symptoms and causes - Mayo Clinic

Barrett's esophagus is a condition in which the flat pink lining of the swallowing tube that connects the mouth to the stomach (esophagus) becomes damaged by acid reflux, which causes the lining to thicken and become red. Barrett's esophagus is associated with an increased risk of developing ...

Migraine with aura - Symptoms & causes - Mayo Clinic

Migraine with aura, once called classic migraine, is a recurring headache that strikes after or at the same time as nervous system symptoms called aura. Aura symptoms usually last less than an hour. They can include flashes of light, blind spots and other vision changes that affect both eyes. Aura also can cause tingling in your hand or face. Sometimes people who have migraine with aura also ...

Infant acid reflux - Diagnosis and treatment - Mayo Clinic

Treatment For most babies, making some changes to feeding eases infant reflux until it gets better on its own. **Medicines** Reflux medicines aren't typically used in children to treat reflux that isn't complicated. But a healthcare professional may recommend an acid-blocking medicine for several weeks or months. Acid-blocking medicines include cimetidine (Tagamet HB), famotidine (Pepcid AC) and ...

Famotidine (oral route) - Side effects & dosage - Mayo Clinic

Description Famotidine is used to treat stomach ulcers (gastric and duodenal), erosive esophagitis (heartburn or acid indigestion), and gastroesophageal reflux disease (GERD). GERD is a condition where the acid in the stomach washes back up into the esophagus. It is also used to treat certain conditions where there is too much acid in the stomach (eg, Zollinger-Ellison syndrome, multiple ...

Walking pneumonia: What does it mean? - Mayo Clinic

Walking pneumonia is a mild bacterial infection that resembles a cold. It usually does not require bed rest or a hospital stay.
